

Participants without a presentation

All presentations (with the exception of the poster presentations) will run as Zoom meeting video calls. The posters presentation will use a talque built-in video call tool.

As non-presenting attendee, just select the program item you want to attend (from the Schedule list) and shortly before the event starts, a “enter” button will appear. Click on it and you are in!

Important: please always enter the call from talque, even if you receive a link to the meeting room by email from Zoom

The “conference room” door: the blue “Enter session now” button.

To enter a presentation, after opening its details from the schedule on the left-side bar, click on the “enter session now” button. It will appear shortly before the scheduled start. You can also refer to the document version of the program (available for [download here](#)). Be aware that several events occur in parallel (the task/case studies and the sessions). Check the program carefully and be aware the minor changes may still occur.
